

LiveFX – Live streams that listen

The creator's voice becomes a meme, a sound and an animated scene in under a second – and tomorrow, a picture for everything spoken.

PRE-SEED ROUND

€500,000

for LiveFX and every LiveFX line · 24 months

PROBLEM

Short videos get edited, live stays raw. Alerts react to viewers, soundboards to keys – no tool reacts to what the creator says.

SOLUTION

Voice → effect: DE/TR/EN auto-detected, dialect tolerance, story mode, viewer triggers, phone remote, offline, open API.

STATUS

Version 2.0 works and is used in our own streams; no revenue yet. TR launch Q4 2026, Pro subscription Q1 2027.

Vision 2027–2029: You talk. It becomes a scene.

Live from words. No editing. No data center.

A Story Film

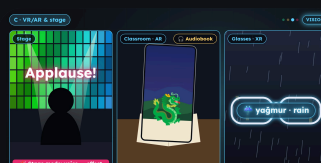

Live video from words · prototype

Every word a picture. Every language a voice.

B WordPicture

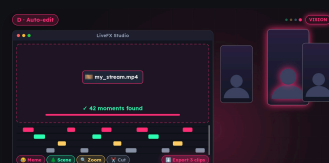

Language learning with picture + pronunciation · prototype

Stage · Classroom · Audiobook · Glasses

C Spaces

Stage, classroom, AR/VR, glasses

Video in. Edited clips out. No upload.

D Studio

Highlights and auto-edit of finished videos
